Introduction

In machine learning, conferences are the most prestigious venues for publication. Top conferences include NeurIPS (previously NIPS), ICML, ICLR, AISTATS, and UAI. They are highly selective, with an acceptance rate of around 25%, and have peer-reviewing processes similar to journals (JMLR, TMLR).

The first or joint-first author (the latter is marked with a ‘*’) of a paper is the lead author. The last or joint-last author is usually the one who came up with the idea and directed the project. They are all considered to be the core authors of the paper.
